

Hammock stand & hammock assembly instruction

Double person Hammock on a American cypress wood stand

Step - 1

Make sure all assembly tools & hardware as per the assembly manual is present.

Step - 2

Place the Wood rails with flat base at a convenient distance from each other

Step 3

Align the wood rails in such a way that the holes are in perfect alignment and use the steel bolts to tighten them.

Step 4

Keep the other beam in-between the center poles and tighten the screws . Make sure the holes are aligned properly in the same line.

Step 5

Eye lags are tighten to the stand as shown in the digital and S-Hook affixed to it.

Step 6

Place the links chain on the S-hook and simply connect it to the hammock

Step 7

Use the link chains to adjust the height. Make sure the hammock is stretched tightly before you load into it.
